## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 26, 2006 has been entered.

### ***Response to Amendment***

The amendment filed on October 26, 2006 has been considered but is ineffective to place the application in condition for allowance.

Additionally all claims should be listed with a status identifier, i.e., Claim 5 (cancelled), Examiner notes claims 5-10, 12, 15 have not been listed with any current status identifier.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 4, 11, 13, 14 and 16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With regard to claim 4 it is unclear how the woodworking tool allowing work piece movement on the woodworking tools through the cutting portion. Is

Art Unit: 3725

the woodworking tool that is allowing the movement the same as the woodworking tools?

Additionally regarding claim 4, the recitation, "approximately perpendicular to the direction of workpiece movement through the cutting portion" is ambiguous as it is not clear if it is the longitudinal direction of the elongated channel slot that is perpendicular to the direction of workpiece movement or if it is the transverse, i.e. width direction of the channel slot that is oriented perpendicular to the direction of workpiece movement. Further, the recitation, "the horizontal member" is not clear, i.e. horizontal to what?

With regard to claims 11, 13, 14 and 16-18, there is insufficient antecedent basis the recitation, "the system", it is unclear if the recitation refers to "A system" recited in line 1 claim 4. or the indexing system recited in line 6. Clarification is required.

Clarification is required to facilitate a clear understanding of the claimed invention and appropriate application of prior art.
